

Kidney Disease Screening Report

Generated: 2026-03-13 16:06:59

Report ID: 1

Patient Name: Demo User

Patient Email: demo_20260313160659@example.com

Report Type: ML-Based Clinical Screening Summary

Prediction Outcome

Model output indicates a higher-risk CKD pattern.

Recommendation: Prioritize nephrology consultation and confirmatory lab tests.

Submitted Clinical Parameters

Parameter	Submitted Value	Expected Range	Status
Age	24	1-120 years	In expected range
Blood Pressure (BP)	100	50-200 mmHg	In expected range
Albumin (AL)	2	0-5	In expected range
Sugar (SU)	0	0-5	In expected range
Red Blood Cells (RBC)	1	0-1	In expected range
Pus Cell (PC)	0	0-1	In expected range
Pus Cell Clumps (PCC)	1	0-1	In expected range
Bacteria (BA)	0	0-1	In expected range
Blood Glucose Random (BGR)	136	50-500 mg/dl	In expected range
Blood Urea (BU)	60	5-250 mg/dl	In expected range
Serum Creatinine (SC)	1.9	0.4-15 mg/dl	In expected range
Potassium (POT)	3.7	2.5-8.5 mEq/L	In expected range
White Blood Cell Count (WC)	9600	3000-20000 cells/cumm	In expected range
Hypertension (HTN)	1	0-1	In expected range
Diabetes Mellitus (DM)	1	0-1	In expected range
Coronary Artery Disease (CAD)	0	0-1	In expected range
Pedal Edema (PE)	0	0-1	In expected range
Anemia (ANE)	1	0-1	In expected range

Important Clinical Note

This report supports screening and consultation readiness only. It is not a final diagnosis.

Clinical decisions must be made by a licensed medical professional with confirmatory tests.
